** Under construction **

In the DDEFi track, students can attend several course units involving Mathematics.

** General information **

- ECTS credits: the maximum number of ECTS credits that can be validated in the track DDEFi is 17 ECTS (contact Christophe Pouet to get advice how to increase this number).
- Teaching period: from early September until end of March/early April.
- Language of instruction: French and English (check each course unit)

Course units offered

Here is a basic description of the possible choices. Some of these choices can be combined with course units offered in the Master Applied Mathematics and Statistics or in the Master Mathematics and Applications. Please visit the DDEFi webpage dedicated to international students for more information.

The DDEFi track can offer only 12 ECTS credits for the taught courses and 5 ECTS credits for the DDEFi project (team project with a private company). If you need to validate more ECTS credits, please visit the DDEFi webpage dedicated to international students for some advice.

The course units offered in the track DDEFi are listed in the table below.
