

JO Train'eng

The “Journées d’Ouverture” or Opening Days, are elective training activities proposed to the students during two weeks. The proposed topics of these electives are chosen to give an openness to new knowledge, new techniques on a wide variety of subjects and problems. For instance understand how to control quadrotor drone flight gives the opportunity to understand the basic of flight mechanics and aerodynamic laws. The subjects offered concern all the subjects taught at the Ecole Centrale: mathematics, computer science, mechanics, economics, chemistry, process engineering, etc.
